

OsteoCentric Trauma

7.0mm & 8.0mm Cannulated Screw Fastener Set

Unifi technology resists multi-planar and multi-directional loads through Mechanical Integration.

Optimized variable thread length 7.0mm screw fastener redefines sacroiliac fixation with full bone purchase across the depth of the sacrum.

Fully comprehensive set includes fully threaded and variable thread screw fasteners up to 180mm.

Differentiated 8.0mm provides nearly 40% more bone volume engagement compared to a 7.0mm.

24mm provides most ideal length for hip fractures¹.

7.0 MM CANNULATED SCREW FASTENERS

Part Numbers	Lengths	Thread
370-5060-024 to 370-5130-024	60-180mm, 5mm increments	24mm
370-5070-034 to 370-5180-034	70-180mm, 5mm increments	Variable
370-5070-034 to 370-5180-034	70-180mm, 5mm increments	Full threads

8.0 MM CANNULATED SCREW FASTENERS

Part Numbers	Lengths	Thread
380-5060-024 to 380-5130-024	60-130mm, 5mm increments	24mm partial

INSTRUMENTS

Part Numbers	Description
2004-2000-06	Cannulated 7.0/8.0mm Instrument Tray
2004-0001-01	Fastener Sleeve With Handle
2004-0001-03	Drill Sleeve 5.0mm
2004-0001-04	Guide Wire Sleeve 2.7mm
2004-0001-05	Trocar
2004-0002	Parallel Wire Guide
2004-0003	Trocar Tip Reduction Tool
2004-0004	7.0mm Countersink Cann Hudson-Mod
2004-0005	4.0mm Hex Driver Cann Hudson-Mod 270mm
2004-0007	7.0mm Screw Fastener Tap Cann Hudson-Mod 300mm
2004-0008	5.0mm Drill Bit Cann Hudson-Mod 330mm
2004-0009	T-Handle Hudson-Mod
2004-0011	Stylet 285mm
300-1302	13mm Washer
300-1601	16mm Washer
2004-0014	2.7mm Guide Wire Drill Tip 300mm
2004-0015	2.7mm Guide Wire Threaded Trocar Tip 300mm
2004-0016	Depth Gauge For 7.0/8.0mm
2004-0020	7.0mm Drill Bit Cann Hudson-Mod 270mm
2004-0021	8.0mm Screw Fastener Tap Cann Hudson-Mod 300mm

Radiologic image shows (2) 7.0mm parallel superior screw fasteners and (1) 8.0mm inferior screw fastener. Cadaver lab. October 2020.
